Calmer®
Corn Heads

CUSTOM-BUILT CORN HEADS

Farmer Invented. Farmer Tested. Farmer Proven.®

Available in 15", 20", and 30" Row Spacing!

www.CalmerCornHeads.com (309) 629-9000

WHY CALMER BUILT?

Fully Equipped with Patented Calmer Corn Head Upgrade Kit

- BT Chopper® Stalk Rolls
- Beveled Stripper Plates
- Chrome Pin Gathering Chains

1 YEAR FULL WARRANTY

CONTACT US FOR DETAILS

Other features:

- Oversized auger to improve feeding
- Universal feeder house opening
- Hydraulic deck plates
- Comes standard with black poly but can upgrade to match your machine

UPTIME KIT INCLUDED.

COMPONENTS VARY BASED ON ROW SPACING.

Row spacing (15", 20", 22", 24", 30")

- Custom built to any number of rows - up to 45 ft wide

Option to add HeadSight®, TrueSight®, Stalk Knockers, and End Hood Augers

Simple, proven design to ease servicing and repair

Universal Feeder House

- Fits John Deere, Case IH, New Holland, CLAAS, & Gleaner combines

Oversized Cross Auger

- 18″ with 26″ pitch
- Height fully adjustable to efficiently convey crop material while reducing grain damage

Hydraulic Stripper Plates

- Beveled design to reduce trash intake and decrease butt shelling

Stainless Steel Backwalls and Trays

OPTIONAL ADD ONS:

Stalk Knockers

Improve tire lifespan and stalk deterioration by adding Stalk Knockers to your head

Precision Planting®

Upgrade with automatic header height and steering control to reduce harvest fatigue with optimal performance

HeadSight®

TrueSight®

AgDirect® Financing Options Available!

APPLY AT AGDIRECT.COM

AgDirect® is an equipment financing program offered by Farm Credit Services of America and other lenders, including participating Farm Credit System Institutions.

ROW SPACING

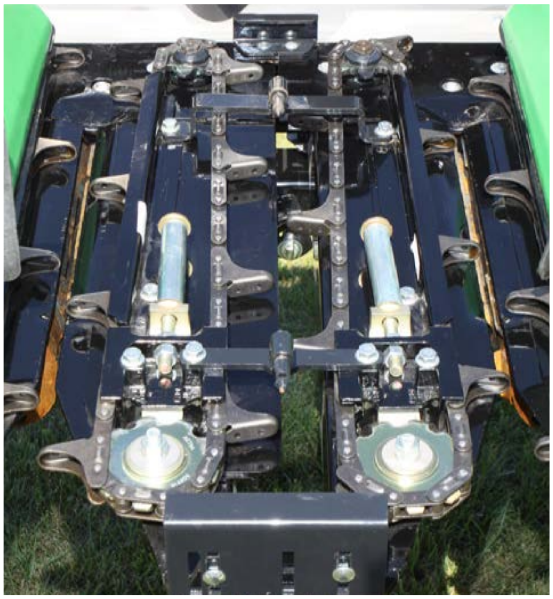

SCAN THE QR CODE TO LEARN MORE ABOUT CUSTOM-BUILT CALMER CORN HEADS

15" Row Spacing

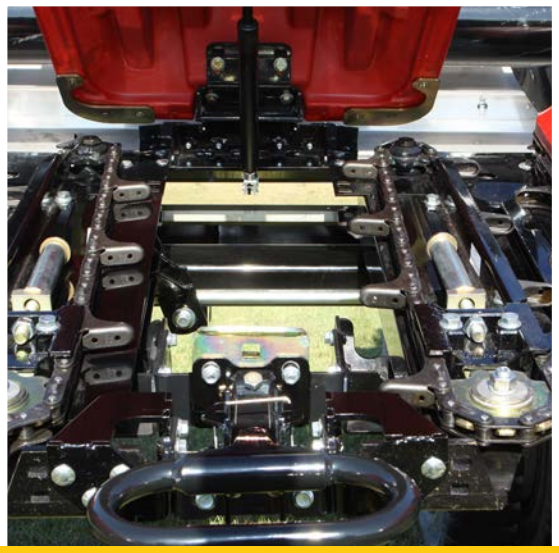

- Single-chain row unit
- BT Chopper Stalk Rolls
- Hydraulic deck plates
- Lightweight poly hoods
- Paddles on chains

Less moving parts with single chain system!

20", 22", & 24" Row Spacing

- Dual gathering chains
- BT Chopper Stalk Rolls
- Hydraulic deck plates
- Lightweight poly hoods

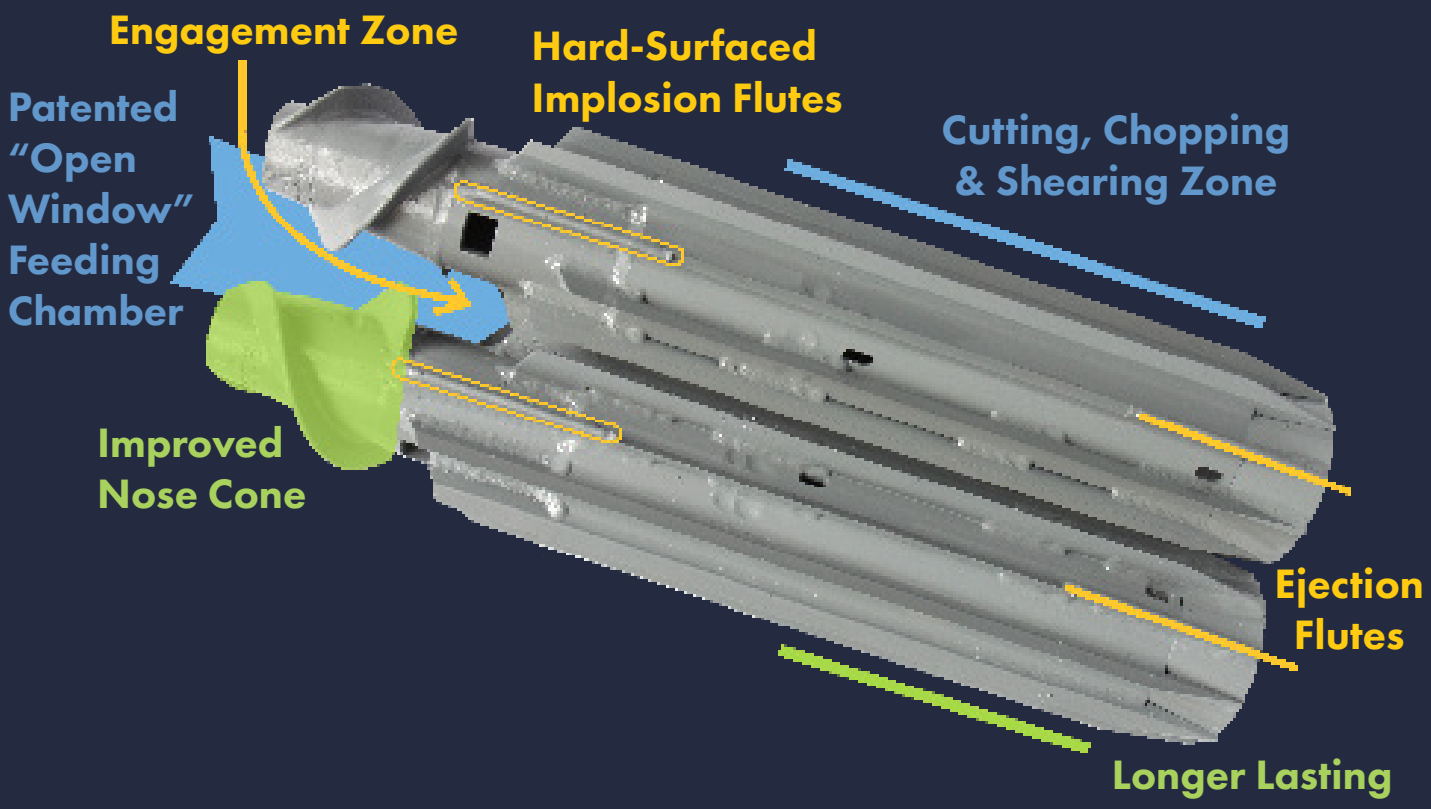

30" Row Spacing

- Dual gathering chains
- BT Chopper Stalk Rolls
- Hydraulic deck plates
- Lightweight, foldable poly hoods
- Simple Latch Design

SUPERIOR BY DESIGN

BT CHOPPER® STALK ROLLS

PERFORMANCE BENEFITS:

Mechanical Advantages

- Smallest Residue Sizing
- Performs in All Crop Conditions
- Great for High-Speed Harvesting
- Picks Cleaner
- Allows for Slower Head Speeds
- Longer Wear Life
- Easier on Gearboxes
- 25% Less Hp Needed than with Chopping Heads

Agronomic Advantages

- Faster Residue Decomposition
- Easier Planting
- Higher Yields
- Warmer/Drier Soils at Planting
- Reduced Nitrogen Penalty
- Compatible with All Tillage Systems

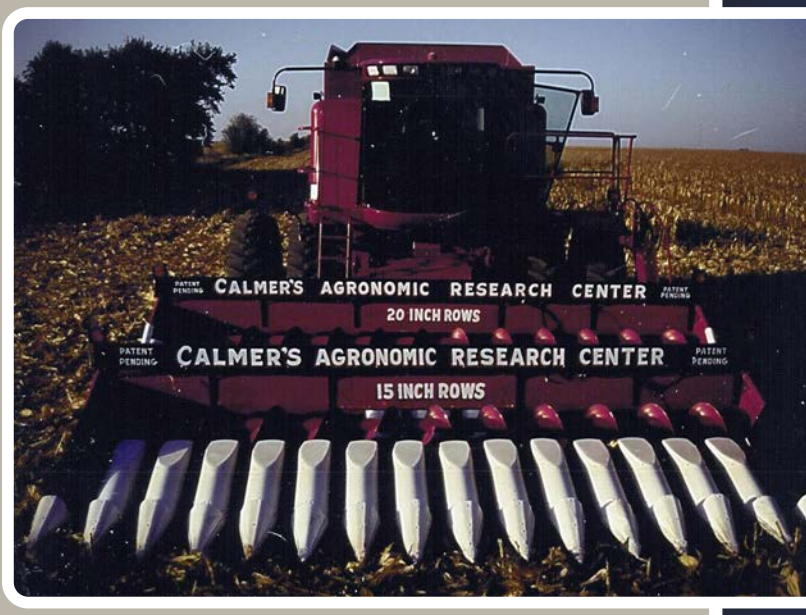

FROM THE FRAME UP

As a long-time farmer, researcher, inventor, and agricultural innovator, Marion Calmer has been sharing his knowledge with farmers for over four decades.

Marion believes deeply in the responsibility farmers have to share their knowledge with other farmers. "Since the beginning farmers have been helping other farmers. The most reliable source of unbiased information is another farmer!" From public speaking engagements, to creating YouTube videos full of farming advice, to hosting college educational workshops, Marion makes it his mission to strengthen fellow farmers' ability to succeed.

In 1994, Calmer's Agronomic Research Center determined that there was a significant yield advantage to growing corn in 15-inch rows. Marion set out to build a 15-inch corn head. During this process, he developed the universal corn picking row unit, which is now commonly referred to as the single-chain corn head. He is the first person in the world to successfully build and test a 15-inch corn head. Four years after its invention, Marion was awarded a U.S. Patent for his idea.

Since this time, Marion has been testing prototypes and other new corn head improvements along with conducting extensive testing. Today, Calmer single chain corn heads are known for lower trash intake, weight reduction, and lower horsepower requirements over competitor corn heads.

In 2006, Calmer began to manufacture dual chain corn heads in addition to the popular single chain. Today, Calmer manufactures custom corn heads fit for any farmer's operation. Any row spacing, any number of rows up to 45 feet wide. Calmer chopping corn heads come standard with the entire line of patented upgrade parts, including the featured BT Chopper® Stalk Rolls, beveled deck plates, and chrome-pin gathering chains. The BT Chopper® Stalk Roll utilizes a patented "open window" feeding chamber to guide stalks toward the razor-sharp blades that cut, chop, and shear corn stalks into confetti-like pieces for accelerated decomposition.

"We have been perfecting corn heads for over 30 years to achieve maximum performance in all weather conditions. Calmer corn heads withstand down corn, standing wet corn, and standing dry corn conditions. We now hold over 90 U.S. and international patents, which we have incorporated into our new corn head to give you the most advanced, trouble-free corn head in the industry. If you have any questions, feel free to call my cell (309) 368-1182 or our front office (309) 629-9000."
